

Muhammad Shahroz

Full-Stack Agentic AI Developer

Karachi, Pakistan | +92 300 3666930 | shahroxyt@gmail.com
linkedin.com/in/muhammad-shahroz-a35b68292 | github.com/Muhammad-Shahr0z

PROFESSIONAL SUMMARY

Full-Stack Developer with 4+ years of experience building production web platforms, AI-powered products and cross-platform mobile apps for international clients. Specialised in React.js/Next.js frontends, Node.js and .NET Core Web API backends, and agentic AI workflows (chatbots, AI vision, LLM integrations). Owns projects end to end: from Figma design to pixel-perfect build, APIs, testing and deployment.

TECHNICAL SKILLS

Core Stack:	React.js, Next.js, TypeScript, Node.js, .NET Core, React Native, Agentic AI, Python
Frontend:	React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML & CSS, Redux / Zustand
Backend & Databases:	Node.js, Express, .NET Core Web APIs, C#, REST APIs, PostgreSQL, SQL Server, MongoDB, Firebase
AI Integration:	OpenAI API, Claude API, LangChain, RAG Pipelines, AI Chatbots, Prompt Engineering
Mobile & Games:	React Native, Expo, Game Development
Design:	Figma, Adobe Photoshop, Adobe Illustrator, Canva, UI/UX Design
Tools & DevOps:	Git & GitHub, Docker, Vercel, CI/CD, Postman, Stripe

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer

2023 - Present

International clients | Remote

Working with international clients as a full-stack developer, owning projects end to end: from a Figma design to a pixel-perfect build, backend, AI integration and deployment.

- Delivered web apps, mobile apps and AI-powered platforms for clients in Canada, the US and beyond
- Built agentic AI workflows and chatbots, including AI vision pipelines for photo-based quoting
- Developed cross-platform mobile apps and games with React Native
- Handle the full lifecycle solo: pixel-perfect frontend from Figma, APIs, databases, testing and deployment

Web Developer

2022 - 2023

Software House | Karachi, Pakistan

Gained hands-on experience in a Karachi software house, building and maintaining client websites and web applications as part of a product team.

- Built responsive, production-ready frontends with React.js from Figma designs
- Developed and integrated REST APIs with Node.js and .NET Core backends
- Fixed bugs, improved performance and shipped features on live client projects
- Worked closely with designers and senior developers in an agile workflow

KEY PROJECTS

Kyronix Digital: Agency Website with Agentic AI Chatbot

2025

Founder & Lead Developer | kyronixdigital.com

Tech: Next.js, React, TypeScript, Python, FastAPI, OpenAI Agent SDK, Agentic AI, AI Chatbot

- The website for Kyronix Digital, the remote-first agency I founded. Built with Next.js and a Python FastAPI backend, it runs an agentic AI chatbot that answers service questions and captures leads.
- **Result:** Live at kyronixdigital.com as the agency's main lead source

Moovez: AI-Powered Moving & Delivery Platform

2025

Full-Stack Developer | moovez.ca

Tech: React.js, Node.js, .NET Core Web APIs, Generative AI, AI Vision

- A moving and delivery platform for Calgary and Edmonton where customers upload photos of their furniture, AI detects each item, estimates size and weight, and generates an instant price.
- **Result:** Live in Calgary and Edmonton with expansion across Alberta

Creativenix: Creative Agency Website with 3D Animations

2025

Full-Stack Developer | creativenix.com

Tech: React.js, Three.js, PHP, REST APIs, Responsive Design

- A bold, animation-rich portfolio website for a creative agency offering graphic design, motion graphics and web development, built with React, Three.js and a PHP backend.
- **Result:** Delivered a pixel-accurate build matching the client's brand vision

Quotely: Multi-Tenant AI Moving Quote Platform

2025

Full-Stack Developer | app.quoteperfectly.com/mahogany-movers

Tech: React.js, Node.js, .NET Core Web APIs, Generative AI, AI Vision, Multi-Tenant Architecture

- A multi-tenant booking platform for moving companies. Customers upload photos, AI detects their items and generates an estimated price, then they complete a guided 7-step booking.
- **Result:** One codebase serving multiple moving companies with isolated data

Quotely Mission Control: Company Admin Dashboard

2025

Full-Stack Developer

Tech: React.js, Node.js, .NET Core Web APIs, Azure App Service, Role-Based Access

- The admin side of Quotely. Registered moving companies sign in to manage customer bookings, accept or reject claims, and control their company profile and settings from one dashboard.
- **Result:** Moving companies self-manage bookings without developer support

EDUCATION

BS Software Engineering

2020 - 2024

Virtual University of Pakistan | Pakistan

Focused on software engineering principles, web development, databases and artificial intelligence.
